

# Weekly Coal Production

Production for Week Ended:  
July 18, 1992

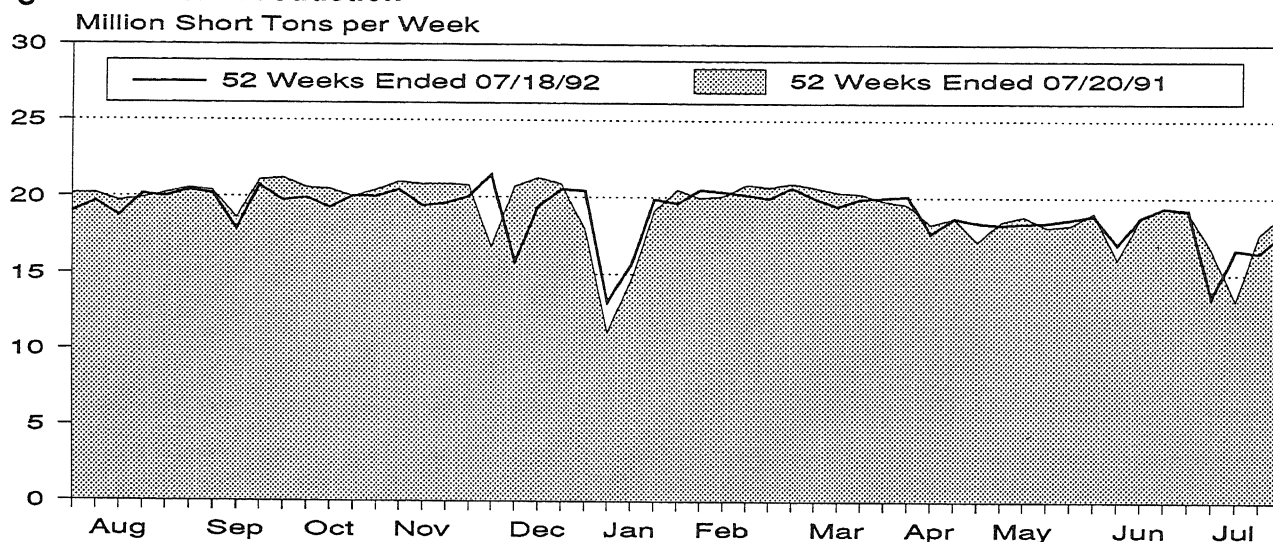

# Summary

U.S. coal production in the week ended July 18, 1992, as estimated from railroad car loadings, by the Energy Information Administration, totaled 18 million short tons. This was 8 percent higher than in the previous week, but 6 percent lower than in the comparable week in 1991.

Production east of the Mississippi River totaled 10 million short tons, and production west of the Mississippi River totaled 8 million short tons.
